	41	27	68

$LRR ((I+J+K+L)/(T)) \times 100$ 84.83% 41.52% 58.61%

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake (F) minus all outcomes (R+V). If your reported ending count does not match these numbers, please go back through your data and be sure you didn't miss something (foster, adoption, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

I agree that in completing this form, we have used the Maddie's Fund definitions of 'Healthy,' 'Treatable-Rehabilitatable,' 'Treatable-Manageable,' and 'Unhealthy & Untreatable' as set forth in 'Maddie's Fund Categorizations/Definitions of Shelter Animals.'
